

Our mission is to conserve nature and reduce the most pressing threats to the diversity of life on Earth. WWF Zurich works at the regional level and represents the objectives of WWF in public and in the environmental policy network of the Canton of Zurich.

Would you like to use your expertise and experience in programming on a voluntary basis for nature? We are looking for a

Volunteer Programmer

Our educational classroom visits teach children about conservation and inspire them to build a future where people and nature thrive. To continue the smooth coordination of the classroom visits, we need a new course management application.

Your tasks

- You independently program a course management application with a backend for participant administration and a registration form in the frontend of our website (www.wwf-zh.ch, Typo3 Version 10). [See also project description](#)
- You help to define the requirements for the program in a joint discussion.

Your profile

- You have experience in programming websites and can create them independently.
- You are able finish this project within the next months (July to October).
- You can offer support in the next 3 years.
- You speak fluently German or English.
- You are willing to donate your time for a good cause.

Interested?

Nina Pfister is looking forward to hearing from you and is happy to answer your questions (Tel.: 044 297 22 22). Please send a description of your programming experience and your availability in a short letter of motivation via email to: nina.pfister@wwf.ch.
